Introduction

This report provides a summary of research publications which were authored by staff from the Royal Devon & Exeter NHS Foundation Trust, or staff with honorary contracts with the RD&E in 2016. Data was collated from PubMed and other sources and deposited in the **RD&E Research Repository** (<http://rde.openrepository.com/rde>).

The RD&E Research Repository launched in March 2015 and is an online collection of data on research publications which have been published by RD&E authors, or those with honorary contracts with the RD&E. It also contains full-text journal articles (within publisher permissions) and other research content such as conference posters, as well as researcher profile pages.

Please note that this report does **NOT** include: conference abstracts, editorials, letters, comments or posters.

Please note that RD&E authors (or those with honorary RD&E contracts) are highlighted in **bold red**. Some articles may appear in more than one section, when they contain authors from multiple disciplines.

Click on the link to the item in the RD&E Research Repository to find the full details of the article, including external links to publisher's sites, and in some cases, the full-text of the article.

If your publications are missing from this report and you would like to include them in the RD&E Research Repository, please contact the RD&E Research Repository team – rde-tr.ResearchRepository@nhs.net,
